

**Vortex flow sensor VA40 ... ZG10 with integrated transducer UVA, capable of parameterization**

Vortex Flow Sensor VA40

**Measurable variable**

- actual flow velocity  $v$  [m/s] and
- actual flow rate [m<sup>3</sup>/h] in air/gases
- conversion to standard velocity/standard volume flow rate by input parameter working pressure and temperature

**Measuring range**

- 0.5 ... 40 m/s

**Functional principle**

- vortex meter for measuring flow velocity, flow rate and volume
- ultrasonic measurement of the vortex shedding

Kármán vortex street

**Design**

- insertion probe with probe guide piece and AS80 housing

**Medium**

- corrosive, caustic gases
- gases containing chlorine and hydrogen chloride
- gases containing SO<sub>2</sub>- and NO<sub>x</sub>
- gases that form acids when wet
- primarily single-phase gas mixtures, e.g. air, nitrogen, oxygen, methane, natural gas, ammonia, argon, carbon monoxide, exhaust gas, etc.
- other gases or gas mixtures on request

**Advantages**

- small starting value (0.5 m/s)
- high measuring dynamics (1 : 80)
- no moving parts
- high time yield
- very corrosion resistant
- operates largely irrespective of the gas composition
- minor pressure drop
- application in Ex-protection Category 3G and 3D (zone 2 and zone 22) permissible
- applications up to SIL2/SC3

**Einsatzfeld,**

**Anwendungsbeispiele**

- flow measurement in particle-laden exhaust air/gas
- alternative to metallic design like Hastelloy, stainless steel, titanium or tantalum
- gas load with mono-chloroacetic acid, hydrochloric acid fumes

**Particles, humidity and condensation**

- charges in the gas caused by particles such as dust and fibres do not affect the measurement, as long as abrasion and agglomeration do not occur on the sensor
- relative gas humidity of less than 100 % does not affect the measuring uncertainty
- slight condensation adsorption on the sensor does not affect the measurement

Model designation (example)							
<b>VA40/21.3</b>	<b>-250</b>	<b>G</b>	<b>K</b>	<b>40 m/s</b>	<b>100</b>	<b>p3</b>	<b>ZG10</b>
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

Types	
Type	Article No.
VA40/21.3 -250 GK 40 m/s 100 / p3 ZG10	B009/720
VA40/21.3 -500 GK 40 m/s 100 / p3 ZG10	B009/721

**(1) Sensor type / Sensor diameter**  
 Vortex flow sensor VA40 with sensor head width across corners 40 mm and shaft Ø 21.3 mm for insertion in openings with a diameter greater than 40 mm

**(2) Sensor length (see Drawing/page 1)**  
 250 / 500 mm

**(3) Medium**  
 ... G ... air / gases

**(4) Materials in contact with the medium**

Design	Material
... K ...	PVDF conductive, ceramics

**(5) Measuring range**

Design	Measuring range
... 40 m/s ...	0.5 ... 40 m/s
Measuring uncertainty	< 1.0 % of meas. value + 0.03 m/s
Repeatability	± 0.2 % of meas. value + 0.025 % of terminal value

**Examples for measurable volume flows see table/page 6**

**(6) Working temperature / seal material**

Design	Material	Working temperature range of medium	Article No.
<b>'t<sub>max</sub> +100 °C'</b>			
	FKM	-20 ... +100 °C	B009/080
	EPDM	-40 ... +100 °C	B009/081
	KALREZ® Compound 4079	0 ... +100 °C	B009/082
	PFA	-20 ... +100 °C	B009/084

**Permissible ambient temperature (Connection housing AS80, see page 3)**

Design	Ambient temperature
without options: - 'ATEX Cat. 3G and 3D', (page 5) - 'LCD'	-40 ... +80 °C
with option 'LCD'	-5 ... +50 °C
with option 'ATEX Cat. 3G and 3D', (page 5)	-40 ... +50 °C

**(7) Max. working pressure / sensor protection**

up to 3 bar / 300 kPa above atmospheric  
ingress protection IP68

**(8) Design**

as in drawing 10 (s. page 1)

**Connection housing AS80**

measurements	80 / 80 / 60 mm (L / B / H)
connection	connector GO 070 with terminal screws
terminal connections	see page 6
type of protection	IP65

**Probe guide pieces \***

Designation	Description	Article no.
with screw thread connection

\* Probe guide pieces are obligatory for process connection via screw socket or flange connector. They are adjustable, rotatable and permanently attached to the probe shaft. It is to be ensured that sensor length, screw socket or flange connector height as well as probe insertion depth match up. Other probe guide pieces are available on request.

### Probe guide pieces \* (cont'd)

Probe guide pieces SF

**Design - Transducer UVA, integrated in the sensor connection housing**

analog output flow / burden	4 ... 20 mA / max. 400 Ohm
output limit value or quantity pulse	open collector / max. 50 mA / max. 27 V DC
PC interface	RS232
self-monitoring	the output signals are electrically isolated from the power supply parameter settings, sensor interface; in case of error: analog output less than 3,6 mA
connection	connector GO 070 with terminal screws, for connection cable diameter 4 ... 10 mm and wire cross section 0.14 ... 0.5 mm <sup>2</sup>
power supply	24 V DC (20 ... 27 V DC)
power consumption	less than 3 W
working temperature range	-40 ... +80 °C
housing	sensor connection housing AS80
EMV	EN 61 000-6-2 and EN 61 000-6-4
setting parameter	analog output, time constant, profile factor/coefficient, tube inside diameter, limit value or impulse of quantity (weight variable), switching actual/standard flow with setting parameters 'working pressure' and 'working temperature'
setting parameter with PC software UCOM and programming adapter (see below) may be modified	

**Functional Safety / Safety Integrity Level (SIL)**

according to DIN EN 61508 part 1 to part 7 and DIN EN 61511 part 1 to part 3, SIL2;  
please pay attention to our document U400.

**Accessories (optional)**

	Description	Art No.
ATEX cat. 3G (zone 2) ATEX cat. 3D (zone 22)	CE <Ex> II 3 G Ex ec IIC T6 Gc X CE <Ex> II 3 D Ex tc IIIC TX Dc X	VAEX2E
LCD in housing cover	2 x 16 digit, 3 mm high, working temperature range -5 ...+50 °C	A010/007
calibration certificate		KLB
PC software UCOM	for config. transducer via RS232	A010/052
programming adapter GO 070 / RS232	for software UCOM, connection PC Sub-D 9-pin, power plug 230VAC/24VDC	A010/004
interface converter USB / RS232	PC connection : USB plug type A on instrument : Sub-D 9-pin	A010/100
flange DN50 PN16	flange for screwing on to a probe guide piece with outside thread G 1½"	B004/998

**Examples – measurable volume flows (see also under '(5) Measuring range', page 2)**

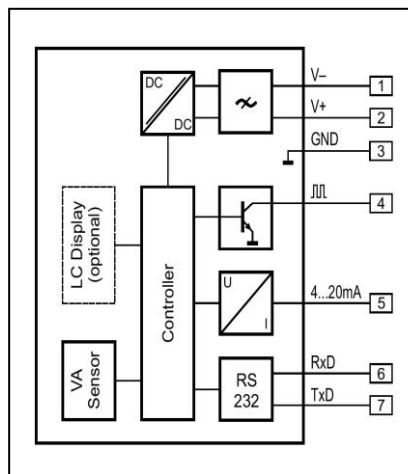

measuring tube inside diameter Di [mm]	profile factor PF* [-]	smallest measurable value [m <sup>3</sup> /h]	terminal value [m <sup>3</sup> /h]
80	0.719	6.5	520
100	0.738	10.4	835
